Submission Deadline:

**July 31, 2023**

This Special Topic will publish original research and review articles in the burgeoning area of paleogenomics and aDNA. Empirical, methodological, and theoretical studies in the following areas are welcome:

- Archaic hominin admixture;
- More recent admixture among modern human populations;
- Leveraging aDNA to make Inferences of human history or the evolutionary processes that have shaped extant patterns of genomic variation;
- Evolutionary history of Neanderthals or Denisovans;
- Software that facilitates analyses of modern and ancient DNA.
